

AB Series

* AB204

Features

- Easy to operate large door opening and all-glass design allow convenient weighing-in
- Built-in interface for data transfer to computers and printers.
- User-friendly application: activated by a simple touch.
- Unbeatable whether from overloads or side impacts
- Excessive forces are transferred directly to the rugged metal housing.
- All-metal housing
- Protective in-use cover
- RS232C interface
- Internal Adjustment weight (adjustment at a keystroke)
- Feed through for below-the-balance weighing

Description

AB-S analytical balances have been developed and designed for simple weighing applications. They are very easy to use and have a rugged construction for worry-free weighing. You get weighing results reliably and fast, at an optimum price-performance ratio. Internal calibration: at a touch - to ensure your quality.
